Wakefield Beasley & Associates Receives Award

Medical Development International
Nocatee, Florida

This facility was designed as a medical office park and was completed in three phases. The project consists of one three-story building and two matching two-story buildings. The entire facility incorporates 73,000 sf of Class A Office Space in the planned community of Nocatee in Florida.

Owner: South St. John, LLC
Architect: Wakefield Beasley & Associates
Structural Engineer: McVeigh & Mangum
Contractor: Elkins Constructors, Inc.
Concrete Supplier: Vulcan Materials Company
Concrete Subcontractor: A.A. Pittman & Sons

The Florida First Coast Chapter of the American Concrete Institute announced the winners of the Chapter's 2009 Concrete Awards at their annual awards ceremony held in November at The River Club. The awards recognize projects completed by the end of 2009 which showed creative use of concrete in facility design.

Wakefield Beasley & Associates's Jacksonville office recently completed the project for Medical Development International which was awarded the *Significant Concrete Structure Award* during the ceremony.
